

CHLORTETRALIF

CHLORTETRACYCLINE 15% GRANULES
FEED GRADE

Growth
Promoter

Chlortetralif is a highly effective antibiotic feed additive which acts against broad spectrum activity, gram positive and negative bacteria, leptospira, chlamydia, spirochetes, rickettsia, pasteurellosis, tuberculosis, protozoa, fowl cholera, CRD, non specific diarrhoea and secondary bacterial infections. **Chlortetralif** acts as growth promoter, prevention of stress, promotes enteric absorption and improvement in performance- egg production, weight gain, survival ratio and growth ratio. Chlortetralif is a natural broad spectrum antibiotic of the tetracycline group. Its activity is bacteriostatic by interfering with the protein synthesis at the S30 ribosome sub-unit. At recommended dosages it has no pharmacological effects on cardiovascular, nervous or other body systems.

COMPOSITION:-

Each kg contains 15% chlortetracycline.

BENEFITS:-

- ◆ Maximum performance and antimicrobial activity.
- ◆ Improves growth and increases stability.
- ◆ Helps to prevent stress on poultry.
- ◆ Helps optimum weight gain.
- ◆ Free flowing characteristic make it homogenous and prevents dusting and caking problems.
- ◆ Granulation increases the stability of feed at room temperature as well as suitable for pellet feeds.

INCLUSION RATE:-

330gm per ton of feed.
Or advised by the **Veterinarian**.

PRESENTATION:-

25kg Bag

Manufactured in India by:
ALIFVET PVT. LTD.
