

VIRGINIALIF-50

VIRGINIAMYCIN 50% POWDER
(FEED PREMIX)

Control
Necrotic
Enteritis

WHAT IS VIRGINIALIF-50?

Virginialif-50 is a potent antibiotic feed premix formulated to enhance growth performance and support disease prevention in poultry. It is especially effective in controlling Necrotic Enteritis by targeting and inhibiting bacterial protein synthesis. While highly effective, its use should be carefully managed, as prolonged or improper application may contribute to the development of antibiotic-resistant bacteria.

COMPOSITION:-

Each kg contains:

Virginiamycin500gm
Carrier Q.S.

BENEFITS:-

- ◆ Helps to decrease severity of Intestinal lesion caused by infections.
- ◆ Maximum performance and activity of birds.
- ◆ Improves growth and increases stability.
- ◆ Helps to prevent stress on poultry.
